### **DETAILED ACTION**

1. Applicant's election with traverse of 3/14/06 is acknowledged. The traversal is on the ground(s) that there is no serious burden placed on the examiner. This is not found persuasive because what constitutes an undue burden may be open to argument, but that there is an additional burden is clear. Group II is a docking system requiring an further search in class 138 for conduit(s) fittings. Group III is a controller per se` having a search of zero overlap with Group(s) I. Each additional claim(s) to treat is also an additional burden.

The requirement is still deemed proper and is therefore made FINAL.

### ***Drawings***

2. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81(c). No new matter may be introduced in the required drawing. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

The shutter mechanisms of claim(s) 4 have not been adequately depicted; in particular, the closing mechanism.

Further, nothing in the drawings reflect that the base of claim(s) 1 is removable.

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the lock of claim(s) 1

must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

4. Claims 1-5 are objected to because of the following informalities:

With regard to claim(s) 1 & 3, line(s) 2, "being formed from" fails to conform to current U.S. practice and is poorly applied grammatically. This appears to be from a literal translation from a foreign document.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

With regard to claim(s) 1, the applicant's preferred embodiment, i.e. the best mode, of the lock has not been disclosed. The examiner is not asserting that the claim(s) are not enabled but rather that the claimed features as envisioned by the applicant have not been delineated.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With regard to claim(s) 1, line(s) 2, "being formed from" is unclear. The applicant is claiming the subcombination of the carrier, as acknowledged in the election. There is no need for recitation of the apparatus term.

***Conclusion***

Art Unit: 3651

8. Claims 6-9 are withdrawn by the examiner as not reading on the elected invention(s). Claim(s) 6-9 are directed to the conveyor/carrier combination.
9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph A. Dillon, Jr. whose telephone number is (571)272-6913. The examiner can normally be reached on 8-5:30, every other Friday off.
